Turning, Repositioning, and Mobilization

You can use this sheet to document **this very important aspect of care**. Use it to document **turning an immobile patient** side to side as well as the **condition of the skin** over bony areas. Also use it to **document other activities** such as how many times the patient was up to the side of the bed, up to a chair, or ambulated, depending on doctor's orders.

Date	Time	Person/Staff	Activity	Skin/Site
